

# Get back on your floor with **RAPID RESTORE**

## Forklift Ready Repairs As Easy As 1..2..3

### **RAPID RESTORE** BENEFITS

Keeping up with concrete floor repairs can be challenging but are a necessary part of maintaining a safe work environment. Smooth, continuous floors minimize wear and tear on equipment, reduce maintenance expenses, avoid scheduling delays, and help employees feel good about their work environment.

Traditional repair products involve down time, require specialized equipment, and can result in wasted repair material. It's easy to avoid them until the problem becomes too big to ignore resulting in more expensive repairs later.

Rapid Restore is quick and easy to apply. It is a simple, fast-setting, long lasting repair material. No more obstacles. No more excuses. Now you can restore your floor to traffic in as little as 15 minutes!

- Not Epoxy or Cement-based
- No Down Time
- No Saw Cutting
- No Pot Mixing, Mess, or Wasted Product
- Extendable with Sand as an Aggregate
- Ultra-Low Viscosity for Deep Absorption
- True Feather Edge Repairs
- Low Odor
- Excellent Chemical Resistance
- Can Be Cut, Drilled, Tapped, and Coated
- Sets Up In Temperatures as Low as -20°F

Ensure the repair area is clean and dry. No square cutting or minimum depth requirements.

Fill the repair area with clean, washed, and dried sand. Saturate with Rapid Restore.

Create a smooth finished surface using a scraper, or trowel. Wait 15 minutes, then turn your floor back to traffic!
